PROJ-EST Ultra Short Throw Wall Mount

Introducing Mitsubishi's new ultra short throw projector mount, the PROJ-EST, a perfect compliment to our new extreme short projector line. Featuring simple installation, and using unique and ingenious design, there's now no need to deal with complex or confusing throw distance to image size calculations. Installers can just determine where the top of projector image needs to be and then adjust the arm distance to the desired image size since the offset remains consistant. Traditional wall mounts adjust the projector in and out on a horizontal plane which can potentially create complex installation issues. As the projector moves away from the screen the image gets larger and lower. The PROJ-EST design moves the projector higher as the screen size gets larger keeping the image height exactly where the presenter wants it. The mount also has micro adjustment knobs to quickly and easily fine tune the registration—ensuring a perfect image.

The PROJ-EST mount can adjust the projector lens out from 19.25" out to 33.75".

Part#: PROJ-EST
Product weight: 17lbs.
Shipping weight: 18.5lbs,
Shipping Dimensions: 5.5" x 27.75" x 10.25"
